

Suicide Prevention Resources

Akin CCSD #91 believes in educating and supporting the whole child. With support from both home and school, the District believes an environment where all children can thrive and overcome negative emotions can be created.

At school, Akin CCSD #91 will be complying with Illinois law by meeting the requirements of Ann Marie's Law. The law, signed in 2015, mandates that all Illinois public schools provide age-appropriate suicide and depression awareness and prevention education programs for students in grades kindergarten through 12.
